

Nature's Organic Colour

100% Paraben, Resorcinol and PPD free, Nature's Colour permanent colour protects the hair from any possible damage and retains its moisture and protein levels so that the hair is not damaged during the colouring process. With its delicate floral scent, it is pleasant to apply, resulting in healthier, satisfied clients and hairstylists. The stabilised activator for colouring and bleaching is enriched with wheat protein. Nature's Colour activators make the texture of the colouring mix perfect from roots to end.
