

NEW KOLESTON PERFECT with ME+

KOLESTON PERFECT with ME+ is the first and only professional hair colour brand to feature breakthrough technologies, Pure Balance Technology™ and ME+™. The Pure Balance Technology™ is designed to minimise the formation of free radicals during colour formation, while the ME+™ technology is designed to replace extreme sensitizers PPD and PTD. NEW KOLESTON PERFECT with ME+ has the same method of application but with significantly less damage after colour, easier mixing, more precise application and an improved fragrance that offers a better experience for colourists and clients.
