

"After" - Raquel Saiz @Salón Blue

After is the celebration of life through a collection full of fantasy, in which hair transmits a message of vitality and positivity.

Colors are the main protagonists, along with details that seem impossible, such as polka dots or geometric motifs, and the reflections of light in the water. Haircuts appear with unexpected details like bangs that overlap or that peek shyly under a curtain of color.

An exercise in evasion and energy charging in difficult moments that has made us realize our own strength and resilience.
